1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.
2. The abstract of the disclosure is objected to because it should be on one sheet only and contain less than 25 lines. Correction is required. See MPEP § 608.01(b).
3. The drawings are objected to because at least the drawing sheet showing Figs. 4 and 5 should be resubmitted with Fig. 5 shifted to the left so that it has an adequate right hand margin in compliance with 37 CFR 1.84(g) and sufficient to show the designation - - - Fig. 5 - - - . Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so

as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

4. Claims 1-9 are objected to because of the following informalities: in claim 1, in line 6 after "outlet" - - - opening - - - should be inserted and in line 11 after "end" - - - thereof - - - should be inserted; in claim 2, line 2 "conventional" should be deleted; in claim 5, line 2 "one of" should be replaced with - - one - - and in claim 7, line 2 "conventional" should be deleted. Appropriate correction is required.

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The cited references, Rodney US 2004/0055363 possibly not prior art, show samplers with flow meters and/or flow control dampers.

However neither they nor any other prior art of record showed or would have made obvious a fluid stream sampler for variable flow rate controlled air sampling with a volumetric flow rate indicator and an adjustable damper panel located in a flowpath disposed in a housing body as set forth in combination with other elements structured and interacting as in claim 1.

6. Claims 1-9 are allowable over the art of record.

7. This application is in condition for allowance except for the following formal matters:

Those set forth in paragraphs 2-4 above.

Art Unit: 2856
